SNTHS Wellness Policy

Preamble

Southern Nevada Trades High School (SNTHS) (hereto referred to as the SFA) is committed to the optimal development of every student. SNTHS believes that for students to have the opportunity to achieve personal, academic, developmental and social success, we need to create positive, safe and health-promoting learning environments at every level, in every setting, throughout the school year.

Research shows that two components, good nutrition and physical activity before, during and after the school day, are strongly correlated with positive student outcomes. For example, student participation in the U.S. Department of Agriculture's (USDA) School Breakfast Program is associated with higher grades and standardized test scores, lower absenteeism and better performance on cognitive tasks.^{1,2,3,4,5,6,7} Conversely, less-than-adequate consumption of specific foods including fruits, vegetables and dairy products, is associated with lower grades among students.^{8,9,10} In addition, students who are physically active through active transport to and from school, recess, physical activity breaks, high-quality physical education and extracurricular activities – do better academically.^{11,12,13,14} Finally, there is evidence that adequate hydration is associated with better cognitive performance.^{15,16,17}

This policy outlines SNTHS approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. Specifically, this policy establishes goals and procedures to ensure that:

- Students in SNTHS have access to healthy foods throughout the school day –both through reimbursable school meals and other foods available throughout the school campus–in accordance with Federal and state nutrition standards;
- Students receive quality nutrition education that helps them develop lifelong healthy eating behaviors;
- Students have opportunities to be physically active before, during and after school;
- Schools engage in nutrition and physical activity promotion and other activities that promote student wellness;
- School staff are encouraged and supported to practice healthy nutrition and physical activity behaviors in and out of school;
- The community is engaged in supporting the work of SNTHS in creating continuity between school and other settings for students and staff to practice lifelong healthy habits; and
- SNTHS establishes and maintains an infrastructure for management, oversight, implementation, communication about and monitoring of the policy and its established goals and objectives.

This policy applies to all students and staff at SNTHS. Specific measurable goals and outcomes are identified within each section below.

I. School Wellness Advisory Group

Committee Role and Membership

SNTHS will convene a representative school wellness committee (hereto referred to as the SWC or work within an existing school health committee) that meets at least two (2) times per year to establish goals for and oversee school health and safety policies and programs, including development, implementation and periodic review and update of this district-level wellness policy (heretofore referred as “wellness policy”).

The SWC membership will include (to the extent possible), but not be limited to: parents and caregivers; students; representatives of the school nutrition program (e.g., school nutrition director); health education teachers; and mental health and social services staff [e.g., school counselors, psychologists, social workers, or psychiatrists]; school administrators (e.g., , principal, vice principal), school board members; health professionals (e.g., dietitians, doctors, nurses, dentists); and the general public. When possible, membership will also include Supplemental Nutrition Assistance Program Education coordinators (SNAP-EDEDSNAP-Ed). To the extent possible, the SWC will reflect the diversity of the community.

Leadership

The Executive Director or their designee(s) will convene the SWC and facilitate development of and updates to the wellness policy and will ensure each school’s compliance with the policy.

Each school must establish LSWP leadership, at the school level, who fully understands the LSWP requirements, who can facilitate the development and implementation of the LSWP, and who has the authority and responsibility to ensure that the school complies with the policy.

The school must designate at the school level, the position(s) responsible for reporting the status of Policy implementation annually. The school must inform the Nevada Department of Agriculture (NDA) the name(s), position(s), and contact information for the person(s) responsible for the oversight of the local school wellness policy at the school level by September 30th of each school year. If the designated wellness policy coordinator changes, the school must notify NDA within 60 days.

School Wellness Committee Members

Title / Relationship to the School or District	Email address	Role on Committee
Executive Director	julie.carver@snvtradeshighschool.org	SWC Chairperson

		Student Representative
		Parent Representative

The school must inform the Nevada Department of Agriculture (NDA) the name(s), position(s), and contact information for the person(s) responsible for the oversight of the local school wellness policy at the school level by September 30th of each school year. If the designated wellness policy coordinator changes, the school must notify NDA within 60 days.

II. Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Implementation Plan

SNTHS will develop and maintain a plan for implementation to manage and coordinate the execution of this wellness policy. The plan delineates roles, responsibilities, actions and timelines and includes information about who will be responsible to make what change, by how much, where and when; as well as specific goals and objectives for nutrition standards for all foods and beverages available on the school campus, food and beverage marketing, nutrition promotion and education, physical activity and other school-based activities that promote student wellness.

SNTHS will use the [Healthy Schools Program online tools](#) to complete a school-level assessment based on the Centers for Disease Control and Prevention’s School Health Index, create an action plan that fosters implementation and generate an annual progress report.

This wellness policy and the progress reports can be found at: [https:// www.snvtradeshighschool.org/](https://www.snvtradeshighschool.org/)

Recordkeeping

SNTHS will retain records to document compliance with the requirements of the wellness policy at SNTHS campus. Documentation maintained in this location will include but will not be limited to:

- The written wellness policy;
- Documentation demonstrating that the policy has been made available to the public;

- Documentation of efforts to review and update the Local Schools Wellness Policy; including an indication of who is involved in the update and methods SNTHS uses to make stakeholders aware of their ability to participate on the SWC;
- Documentation to demonstrate compliance with the annual public notification requirements;
- The most recent assessment on the implementation of the local school wellness policy;
- Documentation demonstrating the most recent assessment on the implementation of the Local School Wellness Policy has been made available to the public.

Annual Notification of Policy

SNTHS will actively inform families and the public each year of basic information about this policy, including its content, any updates to the policy and implementation status. SNTHS will make this information available via SNTHS website and parent communication. SNTHS will provide as much information as possible about the school nutrition environment. This will include a summary of SNTHS events or activities related to wellness policy implementation. Annually, SNTHS will also publicize the name and contact information of SNTHS leading and coordinating the committee, as well as information on how the public can get involved with the school wellness committee.

Annual Progress Assessments

At least once each year, SNTHS will evaluate compliance of the wellness policy to assess the implementation of the policy and include:

- The extent to which the school is in compliance with the wellness policy;
- The extent to which SNTHS wellness policy compares to the Alliance for a Healthier Generation’s model wellness policy; and
- A description of the progress made in attaining the goals of SNTHS wellness policy.

The SWC, will monitor schools’ compliance with this wellness policy.

SNTHS will actively notify households/families of the availability of the triennial progress report.

Revisions and Updating the Policy

The SWC will update or modify the wellness policy based on the results of the annual School Health Index and triennial assessments and/or as SNTHS priorities change; community needs change; wellness goals are met; new health science, information, and technology emerges; and new Federal or state guidance or standards are issued. **The wellness policy will be assessed and updated as indicated at least every three years, following the triennial assessment.**

Community Involvement, Outreach and Communications

SNTHS is committed to being responsive to community input, which begins with awareness of the wellness policy. SNTHS will actively communicate ways in which representatives of SWC and others can participate in the development, implementation and periodic review and update of the wellness policy through a variety of means appropriate for that district. SNTHS will also inform parents of the improvements that have been made to school meals and compliance with school meal standards, availability of child nutrition programs and how to apply, and a description of and compliance with Smart Snacks in School nutrition standards. SNTHS will use electronic mechanisms, such as email or displaying notices on SNTHS website, as well as non- electronic mechanisms, such as newsletters, presentations to parents, or sending information home to parents, to ensure that all families are actively notified of the content of, implementation of, and updates to the wellness policy, as well as how to get involved and support the policy.

SNTHS will ensure that communications are culturally and linguistically appropriate to the community, and accomplished through means similar to other ways that SNTHS is communicating important school information with parents.

SNTHS will actively notify the public about the content of or any updates to the wellness policy annually, at a minimum. SNTHS will also use these mechanisms to inform the community about the availability of the annual and triennial reports.

III. Nutrition

School Meals

Our school is committed to serving healthy meals to children, with plenty of fruits, vegetables, whole grains, and fat-free and low-fat milk; that are moderate in sodium, low in saturated fat, and have zero grams *trans*-fat per serving (nutrition label or manufacturer’s specification); and to meeting the nutrition needs of school children within their calorie requirements. The school meal programs aim to improve the diet and health of school children, help mitigate childhood obesity, model healthy eating to support the development of lifelong healthy eating patterns and support healthy choices while accommodating cultural food preferences and special dietary needs.

SNTHS participates in USDA child nutrition programs, including the National School Lunch Program (NSLP) and the School Breakfast Program (SBP). SNTHS is committed to offering school meals through the NSLP and SBP programs, and other applicable Federal child nutrition programs, that:

- Are accessible to all students;
- Are appealing and attractive to children;
- Are served in clean and pleasant settings;
- Meet or exceed current nutrition requirements established by local, state, and Federal statutes and regulations. (SNTHS offers reimbursable school meals that meet [USDA nutrition standards](#).)
- Promote healthy food and beverage choices using some of the following [Smarter Lunchroom techniques](#):

- Daily fruit options are displayed in a location in the line of sight and reach of students.
 - Daily vegetable options are bundled into all grab-and-go meals available to students.
 - All staff members, especially those serving, have been trained to politely prompt students to select and consume the daily vegetable options with their meal.
 - White milk is placed in front of other beverages in all coolers.
 - Daily announcements are used to promote and market menu options.
- Menus will be posted on SNTHS website and will include nutrient content and ingredients.
 - Menus will be created/reviewed by a Registered Dietitian or other certified nutrition professional.
 - SNTHS child nutrition program will accommodate students with special dietary needs.
 - Students will be allowed at least 15 minutes to eat breakfast and at least 20 minutes to eat lunch, counting from the time they have received their meal and are seated (meets Healthy Schools Program Gold-level criteria).
 - Students are served lunch at a reasonable and appropriate time of day.
 - Participation in Federal child nutrition programs will be promoted among students and families to help ensure that families know what programs are available in their children's school.

Staff Qualifications and Professional Development

All school nutrition program directors, managers and staff will meet or exceed hiring and annual continuing education/training requirements in the [USDA professional standards for child nutrition professionals](#). These school nutrition personnel will refer to [USDA's Professional Standards for School Nutrition Standards website](#) to search for training that meets their learning needs.

Water

To promote hydration, free, safe, unflavored drinking water will be available to all students throughout the school day. SNTHS will make drinking water available where school meals are served during mealtimes.

- Water cups/jugs will be available in the cafeteria if a drinking fountain is not present.
- All water sources and containers will be maintained on a regular basis to ensure good hygiene and health safety standards. Such sources and containers may include drinking fountains, water jugs, hydration stations, water jets and other methods for delivering drinking water.]
- Students will be allowed to bring and carry (approved) water bottles filled with only water with them throughout the day.
- Hydration stations/water bottle fillers will be available on campus

Competitive Foods and Beverages

SNTHS is committed to ensuring that all foods and beverages available to students on the school campus* during the school day* support healthy eating. There will be no food & beverages sold and served outside of the school meal programs (e.g., "competitive" foods and beverages).

Celebrations and Rewards

All foods offered on the school campus will meet or exceed the USDA Smart Snacks in School nutrition standards including through:

1. Celebrations and parties. SNTHS will provide a list of healthy party ideas to parents and teachers, including non-food celebration ideas as suggested by the [Alliance for a Healthier Generation](#) and from the [USDA](#).
2. Classroom snacks brought by parents. SNTHS will provide to parents a [list of foods and beverages that meet Smart Snacks](#) nutrition standards. No carbonated beverages are allowed.
3. Rewards and incentives. SNTHS will provide teachers and other relevant school staff a [list of alternative ways to reward children](#). Foods and beverages will not be used as a reward, or withheld as punishment for any reason, such as for performance or behavior.

Fundraising

SNTHS will limit food fundraisers and encourage those promoting physical activity (such as walk-a-thons, Jump Rope for Heart, fun runs, etc.).

Fundraising outside school hours will sell only non-food items or foods and beverages that meet or exceed the Smart Snacks nutrition standards. These fundraisers may include but are not limited to, donation nights at restaurants, cookie dough, candy and pizza sales, market days, etc.

Nutrition Promotion

Nutrition promotion and education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages, and by creating food environments that encourage healthy nutrition choices and encourage participation in school meal programs. Students and staff will receive consistent nutrition messages throughout the school. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by school staff, teachers, parents, students and the community.

SNTHS will promote healthy food and beverage choices for all students throughout the school campus, as well as encourage participation in school meal programs.

Nutrition Education

SNTHS will teach, model, encourage and support healthy eating by all students and will provide nutrition education and engage in nutrition promotion that:

- Is designed to provide students with the knowledge and skills necessary to promote and protect their health;
- Promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products and healthy food preparation methods;
- Emphasizes caloric balance between food intake and energy expenditure (promotes physical activity/exercise);

- Links with school meal programs, cafeteria nutrition promotion activities other school foods and nutrition-related community services;
- Teaches media literacy with an emphasis on food and beverage marketing; and
- Includes nutrition education training for teachers and other staff.

Essential Healthy Eating Topics in Health Education

SNTHS will include in the health education curriculum a minimum of 12 of the following essential topics on healthy eating:

- Relationship between healthy eating and personal health and disease prevention
- Food guidance from [MyPlate or similar program](#)
- Reading and using FDA's nutrition fact labels
- Eating a variety of foods every day
- Balancing food intake and physical activity
- Eating more fruits, vegetables and whole grain products
- Choosing foods that are low in fat, saturated fat, and cholesterol and do not contain *trans* fat
- Choosing foods and beverages with little added sugars
- Eating more calcium-rich foods
- Preparing healthy meals and snacks
- Risks of unhealthy weight control practices
- Accepting body size differences
- Food safety
- Importance of water consumption
- Importance of eating breakfast
- Making healthy choices when eating at restaurants
- Eating disorders
- [The Dietary Guidelines for Americans](#)
- Reducing sodium intake
- Social influences on healthy eating, including media, family, peers and culture
- How to find valid information or services related to nutrition and dietary behavior
- How to develop a plan and track progress toward achieving a personal goal to eat healthfully
- Resisting peer pressure related to unhealthy dietary behavior
- Influencing, supporting, or advocating for others' healthy dietary behavior

Food and Beverage Marketing in Schools

SNTHS is committed to providing a school environment that ensures opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. SNTHS strives to teach students how to make informed choices about nutrition, health and physical activity. These efforts will be weakened if students are subjected to advertising on school campus that contains messages inconsistent with the health information SNTHS imparting through nutrition education and health promotion.

efforts. It is the intent of SNTHS to protect and promote student's health by permitting advertising and marketing for only those foods and beverages that are permitted to be sold on the school campus, consistent with SNTHS wellness policy.

Any foods and beverages marketed or promoted to students on the school campus will be part of the already existing school meal programs.

Food and beverage marketing is defined as advertising and other promotions in schools. Food and beverage marketing often includes an oral, written, or graphic statements made for the purpose of promoting the sale of a food or beverage product made by the producer, manufacturer, seller or any other entity with a commercial interest in the product.¹⁵ This term includes, but is not limited to the following:

- Brand names, trademarks, logos or tags, except when placed on a physically present food or beverage product or its container.
- Displays, such as on vending machine exteriors
- Corporate brand, logo, name or trademark on cups used for beverage dispensing, menu boards, coolers, trash cans and other food service equipment; as well as on posters, book covers, pupil assignment books or school supplies displayed, distributed, offered or sold by SNTHS.
- Advertisements in school publications or school mailings.
- Free product samples, taste tests or coupons of a product, or free samples displaying advertising of a product.

IV. Physical Activity

Children and adolescents should participate in at least 60 minutes of physical activity every day. A substantial percentage of students' physical activity can be provided through a comprehensive school physical activity program (CSPAP). A CSPAP reflects strong coordination and synergy across all of the components: quality physical education as the foundation; physical activity before, during and after school; staff involvement and family and community engagement and SNTHS is committed to providing these opportunities. School will ensure that these varied physical activity opportunities are in addition to, and not as a substitute for, physical education (addressed in "Physical Education" subsection). SNTHS staff will be encouraged to participate in *Let's Move! Active Schools* (www.letsmoveschools.org) in order to successfully address all CSPAP areas.

Physical Education

SNTHS will provide students with physical education, using an age-appropriate, sequential physical education curriculum consistent with national and state standards for physical education. The physical education curriculum will promote the benefits of a physically active lifestyle and will help students develop skills to engage in lifelong healthy habits, as well as incorporate essential health education concepts (discussed in the “*Essential Physical Activity Topics in Health Education*” subsection). The curriculum will support the essential components of physical education.

All students will be provided equal opportunity to participate in physical education classes. SNTHS will make appropriate accommodations to allow for equitable participation for all students and will adapt physical education classes and equipment as necessary.

SNTHS physical education program will promote student physical fitness through individualized fitness and activity assessments (via the [Presidential Youth Fitness Program](#) or other appropriate assessment tool) and will use criterion-based reporting for each student.

Essential Physical Activity Topics in Health Education

SNTHS will require students to take and pass at least one health education course. SNTHS will include in the health education curriculum a minimum of 12 the following essential topics on physical activity:

- The physical, psychological, or social benefits of physical activity
- How physical activity can contribute to a healthy weight
- How physical activity can contribute to the academic learning process
- How an inactive lifestyle contributes to chronic disease
- Health-related fitness, that is, cardiovascular endurance, muscular endurance, muscular strength, flexibility, and body composition
- Differences between physical activity, exercise and fitness
- Phases of an exercise session, that is, warm up, workout and cool down
- Overcoming barriers to physical activity
- Decreasing sedentary activities, such as TV watching
- Opportunities for physical activity in the community

- Preventing injury during physical activity
- Weather-related safety, for example, avoiding heat stroke, hypothermia and sunburn while being physically active
- How much physical activity is enough, that is, determining frequency, intensity, time and type of physical activity
- Developing an individualized physical activity and fitness plan
- Monitoring progress toward reaching goals in an individualized physical activity plan
- Dangers of using performance-enhancing drugs, such as steroids
- Social influences on physical activity, including media, family, peers and culture
- How to find valid information or services related to physical activity and fitness
- How to influence, support, or advocate for others to engage in physical activity
- How to resist peer pressure that discourages physical activity.

Classroom Physical Activity Breaks (Elementary and Secondary)

SNTHS recognizes that students are more attentive and ready to learn if provided with periodic breaks when they can be physically active or stretch. Thus, students will be offered **periodic opportunities** to be active or to stretch throughout the day on all or most days during a typical school week. SNTHS recommends teachers provide short (3-5-minute) physical activity breaks to students during and between classroom time at least three days per week. These physical activity breaks will complement, not substitute, for class transition periods.

SNTHS will provide resources and links to resources, tools, and technology with ideas for classroom physical activity breaks through [USDA](#) and the [Alliance for a Healthier Generation](#).

Active Academics

Teachers will incorporate movement and kinesthetic learning approaches into “core” subject instruction when possible (e.g., science, math, language arts, social studies and others) and do their part to limit sedentary behavior during the school day.

Before and After School Activities

SNTHS does not currently offers opportunities for students to participate in physical activity either before and/or after the school day.

Active Transport

SNTHS will support active transport to and from school, such as walking or biking. SNTHS will encourage this behavior by engaging in *four or more* of the activities below; including but not limited to:

- Promote activities such as participation in International Walk to School Week, National Walk and Bike to School Week
- Secure storage facilities for bicycles and helmets (e.g., shed, cage, fenced area)
- Instruction on walking/bicycling safety provided to students
- Promote safe routes program to students, staff, and parents via newsletters, websites, local newspaper

V. Other Activities that Promote Student Wellness

SNTHS will integrate wellness activities across the entire school setting, not just in the cafeteria, other food and beverage venues and physical activity facilities. SNTHS will coordinate and integrate other initiatives related to physical activity, physical education, nutrition and other wellness components so all efforts are complementary, not duplicative, and work towards the same set of goals and objectives promoting student well-being, optimal development and strong educational outcomes.

SNTHS staff will be encouraged to coordinate content across curricular areas that promote student health, such as teaching nutrition concepts in mathematics

All efforts related to obtaining federal, state or association recognition for efforts, or grants/funding opportunities for healthy school environments will be coordinated with and complementary of the wellness policy, including but not limited to ensuring the involvement of the SWC/SWC.

All school-sponsored events will adhere to the wellness policy guidelines. All school-sponsored wellness events will include physical activity and healthy eating opportunities when appropriate.

Community Partnerships

SNTHS will *develop*, relationships with community partners (e.g., hospitals, universities/colleges, local businesses, SNAP-Ed providers and coordinators, etc.) in support of

this wellness policy's implementation. Existing and new community partnerships and sponsorships will be evaluated to ensure that they are consistent with the wellness policy and its goals.

Community Health Promotion and Family Engagement

SNTHS will promote to parents/caregivers, families, and the general community the benefits of and approaches for healthy eating and physical activity throughout the school year. Families will be informed and invited to participate in school-sponsored activities and will receive information about health promotion efforts.

As described in the "Community Involvement, Outreach, and Communications" subsection, SNTHS will use electronic mechanisms (e.g., email or displaying notices on SNTHS website), as well as non-electronic mechanisms, (e.g., newsletters, presentations to parents or sending information home to parents), to ensure that all families are actively notified of opportunities to participate in school-sponsored activities and receive information about health promotion efforts.

Staff Wellness and Health Promotion

SNTHS will implement strategies to support staff in actively promoting and modeling healthy eating and physical activity behaviors. Examples of strategies schools will use, as well as specific actions staff members can take, include using Yoga Ed, staff outings and eliminating vending machines with unhealthy food. SNTHS promotes staff member participation in health promotion programs and will support programs for staff members on healthy eating/ weight management that are accessible and free or low-cost.

Professional Learning

When feasible, SNTHS will offer annual professional learning opportunities and resources for staff to increase knowledge and skills about promoting healthy behaviors in the classroom and school (e.g., increasing the use of kinesthetic teaching approaches or incorporating nutrition lessons into math class). Professional learning will help staff understand the connections between academics and health and the ways in which health and wellness are integrated into ongoing reform or academic improvement plans/efforts.

Glossary:

Extended School Day – the time during, before and afterschool that includes activities such as clubs, intramural sports, band and choir practice, drama rehearsals and more.

School Campus - areas that are owned or leased by the school and used at any time for school- related activities, including on the outside of the school building, school buses or other vehicles used to transport students, athletic fields and stadiums (e.g., on scoreboards, coolers, cups, and water bottles), or parking lots.

School Day – the time between midnight the night before to 30 minutes after the end of the instructional day.

Triennial – recurring every three years.

Appendix A: USDA Nutrition Standards

See the following pages for current USDA meal pattern requirements.

School Breakfast Meal Pattern, SY 2019-20, 5-Day

Serve Only

- Minimum 3 items daily. Must prepare each of 3 required items in required amounts: Milk, Fruit/Juice/Vegetable, Grain

Offer vs. Serve (OVS)

- Minimum 4 items daily. Must prepare each of 3 required items in required amounts: Milk, Fruit/Juice/Vegetable, Grain and 1 additional item (may be grain, fruit/juice/veg, or meat/meat alternate)
- Students must have at least 3 items on tray at POS, 1 item must be a ½ cup Fruit/Juice/Vegetable
